2010

Go Days

Green Days

Good for business launches in general, sending newsletters, teaching classes, hosting events. These days support creative acts, business deals and public activities, parties and events.

No Days

No major business activity recommended, such as launches or buying homes.

Slow Days

Do accounting, desk work and catch up work on these days. These days are not supportive for big business deals, launches, buying homes, signing contracts in general. Complete behind the scenes tasks on Slow Days.

There are 5 - 6 days Slow Days every month. Still conduct business as usual, just be prepared for more obstacles than usual.

Black font days are generally neutral.

These dates give general information on the day. Your Vedic chart and your Life Code determines whether these days are still green for you as an individual.

For best results in business, a consultation with Kathleen determines the best dates for you and your plans.
